

Oracle 11i Implementation

Our customer is a leading developer and manufacturer of removable data storage products designed to help customers create, protect, and retrieve valuable digital assets.

BUSINESS SITUATION | 01

- > The need to support a new business model based on current company structure
- > With the selling of many business units, a major data cleanup was identified as a priority
- > Add MOW (Asia Pacific and Australia) to the same Oracle 11i instance as Europe

WHY MOTION INTERNATIONAL WAS SELECTED | 02

- > Oracle implementation experience
- > Global project rollout experience
- > Global implementation partner
- > Global presence and experience
- > Ability to provide reliable resources

MODULES - PROCESSES | 03

- > EDI 810, 820, 850, 855, 856, 940, 943, 944, 945, 947, 997
- > General Ledger, Accounts Receivable, Accounts Payable, Cash Management, Fixed Assets, Account Builder
- > Order Management, Shipping
- > Advanced Pricing

- > Inventory
- > Purchasing
- > Human Resources
- > Manugistics (Demand Planning and Forecasting)

RESULTS | 04

- > Implement a more robust, efficient, and user friendly system
- > Major data cleanup before converting data to 11i
- > Add MOW (Asia Pacific and Australia) to European instance and transfer support for MOW from the US to Europe
- > Restructuring of pricing to take advantage of the new capabilities offered in the Advanced Pricing module

OUR APPROACH | 05

- > Require support and involvement from the business
- > Involve users in testing to enhance their exposure to the new application before Go-Live
- > Assess business processes to apply them to the new 11i technology
